

Everything a designer needs.

THE WORDMARKS

signal studio. notes. tasks' timeline' signal'

Lowercase, always. The umbrella and notes seat a period on the baseline; tasks, timeline and signal lift a dot to cap height. In colour work the dot is indigo — it is the brand's one accent. SVG and PNG masters at every size: signalstudio.ie/brand/signal-studio-brand-kit.zip

THE PALETTE

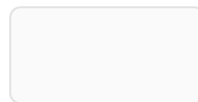

Indigo #4f46e5

Ink #111111

Paper #ffffff

Recessed #fafafa

THE RULES

One indigo per composition. The accent is earned, once — usually the dot. Everything else is ink on paper.

Type is Geist. Geist Sans for words, Geist Mono for small technical labels. If Geist is unavailable, use Helvetica or Arial — never a serif, never a display face.

Hairlines, not shadows. Dividers are 1px at 10% ink. No drop shadows, no gradients, no glow.

Don't rework the marks. No recolouring beyond ink/paper/indigo, no stretching, no outlines, no effects, no containers unless using the supplied app-icon tiles.

Clear space. Give the wordmark its own cap-height of clear space on every side.

Naming. Signal Studio (the company) · Signal Notes, Signal Tasks, Signal Timeline and Signal (the products). Lowercase wordmark forms are for the marks only, not running text.

Alt text. Every published image carries real alt text; templates ship with the kit.

No exclamation marks. House style is declarative. If quoting us, the copy will already read that way.
